2002 Annual Utilization Report of Hospitals Report Form Facsimile	•

#### Introduction

The Office of Statewide Health Planning and Development (OSHPD) annually produces the statewide Annual Utilization database. The data come from the individual ALIRTS-based Annual Utilization Report of Hospitals that are filed by California's licensed hospital campuses, for the previous calendar year. The data are "as reported" by each facility, after complying with input quality control edits. The hospital utilization database includes additional data fields many derived from licenses issued by the California Department of Health Services. Due to occasional time lags between licensing activities, and subsequent updates to the OSHPD's Licensed Facility Information System (LFIS), some fields based on licensing data may contain missing or outdated information. Also, as with most new, complicated systems, there will likely be unanticipated problems and omissions that will be subsequently corrected in future sets of the database. OSHPD welcomes suggestions for improving our data products; email your suggestions to hircweb@oshpd.ca.gov.

#### **Number of Hospitals**

There were 483 hospital locations that submitted an *Annual Utilization Report of Hospitals* for 2002. Their reported data are displayed in the two database worksheets (titled, "Sections 1 – 4," and "Sections 5 & 6"). The 46 hospitals that failed to submit their reports are listed in the "Non-Responders" worksheet with their licensed beds and licensed Emergency Department levels.

#### **ALIRTS**

Beginning with 2002 data, hospitals began submitting their utilization data to OSHPD through a new, paperless, Internet-based reporting system known as ALIRTS (<u>A</u>utomated <u>L</u>icensing Information and <u>R</u>eport <u>Tracking System</u>). Once the reported data are submitted and meet the Office's input quality criteria, the data are accepted and immediately become available to the public via the Internet (<a href="http://alirts.oshpd.state.ca.us">http://alirts.oshpd.state.ca.us</a>). In addition to the data reported by each licensed facility, ALIRTS also has current and historical facility licensing information. The ALIRTS perspective for both utilization data and licensing data is by individual licensed facility.

Once the data from virtually all, individual licensed hospital campuses are accepted, OSHPD creates this Annual Utilization Report of Hospitals database.

#### **New Data File Format**

In addition to online reporting, the other significant change for 2002 data is the file type used for the public database. Rather than displaying the data in two separate, comma-delimited text files, all data fields are now included in one MS-Excel file (in two, separate worksheets). In both data worksheets, each row (line) displays all the data from one hospital, while each column displays the values, for one data field (sequentially, by row and column, from the report form).

Excel was chosen because it is the analytical software used by most hospital utilization data users, because it has become nearly as generic as text files and because it can handle multiple worksheets in one file. For those data users who do no have Excel, most analytical software can import Excel worksheets. If the Excel file format is incompatible with your software, contact OSHPD (hirc@oshpd.ca.gov) to obtain individual, comma-delimited text data files.

#### **MS-Excel Worksheets**

There are four Worksheets in the 2002 Hospital Utilization Excel File. To navigate from one worksheet to another, click on the applicable tab at the bottom of your screen. (see figure 1, below):

Figure 1

Worksheet Description

**<u>Tips</u>**: includes suggestions and tips for using both the data and Excel.

**Sections 1 - 4** (from *Annual Utilization Report of Hospitals* report form):

- Section 1 includes facility descriptors, e.g., name, address, operational status.
- Section 2 describes the licensee (owner of license) and principal type of service.
- Section 3 displays licensed beds and inpatient utilization.
- **Section 4** has Emergency Department licensing and utilization data (for licensed Emergency Medical Services).

<u>Sections 5 & 6</u> (from *Annual Utilization Report of Hospitals* report form):

- **Section 5** covers surgery services; general surgery as well as cardiovascular surgery and cardiac catheterization services.
- **Section 6** provides data covering major Capitol Expenditures consisting of construction projects and purchases of major medical equipment.

**NonResponders2002**: lists name and address for each hospital that failed to report their utilization data for 2002. Also listed for each non-responding hospital are their licensed bed capacities and licensed Emergency Medical Service level.

Note - the first two columns in both <u>data</u> worksheets display the hospital's name and OSHPD\_ID number. Also, both data worksheets list hospitals in numeric order by OSHPD\_ID number (Column A), thus data for each hospital appears in the same row in both worksheets. (Because the county code is in the third and fourth digits, the hospital rows are also in county order when sorted in numeric order).

#### Significant Data Changes for the 2002 Utilization Database

Although most data items continue to be reported in the same or similar formats, there are four areas with significant data changes for 2002:

 Most Hospital-based Long-Term Care (LTC) patient census specific fields have been dropped for 2002. LTC bed capacity and utilization are still displayed. (A much richer source for hospital patient demographics, including hospital based LTC patient demographic data, is the Patient Discharge Data set available from OSHPD.)

- 2. **Emergency Medical Services** (E.M.S.) section has been enhanced, including new fields for EMS staffing, EMSA Trauma Center Designation, and numbers of diversion hours by month.
- 3. The Cardiology and Cardiovascular Surgery data include more procedures details.
- 4. The **Licensee** (License owner) Control Types have changed, see table below:

	LICENSEE TYPE OF CONTROL						
General Category	2002 Selections	2001 and Prior Years Selections (codes)					
	Investor – Individual	For Profit – Individual (23)					
For Profit	Investor – Partnership	For Profit – Partnership (24)					
POLETOIL	Investor - Limited Liability Company Investor – Corporation	Investor – Corporation (25)					
		Nonprofit Corporation (18)					
	Newswell Composition (includes about his lated)	Kaiser Foundation Hospitals (19)					
Non-Profit	Nonprofit Corporation (includes church-related)	Church Related (20)					
		Other Non-Profit (21)					
	University of California	University of California (22)					
	State	State (11)					
		County (12)					
Government	City and/or County	City (13)					
		City/County (14)					
	District	District (15)					

5. New fields for displaying future data items, not reported by the hospitals nor received from the Licensing and Certification Division of DHS are included in this dataset. Some of these fields remain unpopulated for 2002, but will be populated in future datasets. These fields begin in Column V (Management Company), and continue through Column AG (the L.A. County Service Plan Area).

#### **Emergency Medical Services (E.R.) Licensed Level Changes**

The hospitals below de-licensed their Emergency Medical Services during 2002:

OSHPD_ID	Hospital Name	EMS Level	Comments
106154101	Bakersfield Heart Hospital	Basic	Dropped EMS license on 6/1/02 (then re-licensed on 2/13/03)
106040828	Enloe Medical Center - Cohasset Campus	Basic	Dropped EMS on 6/30/02
106200692	Chowchilla District Memorial Hospital	Standby	Dropped EMS on 11/06/02
106240853	Dos Palos Memorial Hospital	Standby	Dropped EMS on 5/31/02

#### **Header Rows**

Header rows are included to provide names for each data field (column). Three header rows are included for each data worksheet. As downloaded, the two on the first and second lines are alternatives; the header row on the fourth row is associated with the data rows. (Because row

three is blank, the two header rows above are not associated with the database. By eliminating that blank row, row one would become the header row and the second and third header rows would be treated as "data rows" by Excel.)

	Α	В	С			
1	OSHPD_ID	FAC_NAME	FAC_ADDRESS_ONE slc010301			
2	slc010201	slc010101

7	106010776	HILDRENS HOSPITAL AND RESEARCH CTR AT OAKLAND 747 52ND STREET				

Figure 2

The reasons for three header rows are both people and machine based. Some people prefer English names, so the first row displays English abbreviations. The disadvantage of using abbreviations is the difficulty in coining unique abbreviated field names for the many variations on themes in the data. One can be easily mislead by similar sounding abbreviations for different variables. To avoid this confusion, OSHPD has traditionally provided field names that display the report form coordinates. The row directly above the data rows (in both data worksheets) is such a header row. Most field titles in this row (including all facility reported data fields), display their respective report form coordinates from the ALIRTS Annual Utilization Report of Hospitals report form.

The field names display the **section+line+column** numbers, delimited by "dots" (periods). For example, the response to "Was this hospital in operation at anytime during year?" is reported in section 1, line 9, column 1. This field appears in spreadsheet Column I in the "Sections 1–5" worksheet and is displayed as "1.9.1." This format is the least complex way to display, and the easiest way for humans to read these coordinates. Using report form coordinates does require the data user to refer to a copy of the report form when using the database. A copy of the blank reporting form is provided as Appendix A, on the last 10 pages of this documentation file (PDF pages 13 through 23). It is highly recommended to print a hard copy for reference.

#### Additional Header Rows with Alternative Field Names

In each data worksheet, rows one and two are alternative header rows. The field names in the first row display English abbreviations while the names in the second row display section-line-column coordinates in a format that is more consistent with requirements of database software.

The alternative **section+line+column** format (row 2) contains alpha characters and does not include periods. Each field name in this set begins with the constant "slc", followed by 2-digit section, 2-digit line and 2-digit column numbers. Thus, using the previous example, "Was this hospital in operation at anytime during year?" (section 1, line 9, column 1), the "slc" scheme yields the field name "slc010901."

If the data in the hospital utilization data worksheets are intended to be imported into other analytical (database) software, be aware that some database applications require at least one alpha character in the field name, while others will not allow "periods." The alternative field names in the two first rows both meet these naming conventions.

Report Form   Section-Line-Column Coordinates   Short Version with periods   Abbreviation   Description	last 4 digits are unique within each
Section-Line-Column Coordinates   Short Version with periods   Long Version with alpha and without alpha   Abbreviation   Abbreviation   Abbreviation   OSHPD Identification Number is a nine-digit number: State hospital IDs begin with hospital IDs is "106."
